

Health IT Quick-Stat #17

Percent of Physicians e-Prescribing through an Electronic Health Record

2008-2013

Summary:

In the past five years, physician Electronic Health Record (EHR) adoption has surged, reaching all corners of the country. The percentage of physicians e-Prescribing via an EHR has accelerated from 7 percent in December 2008 to 66 percent as of December 2013.

Click this link for an animation of e-Prescribing acceleration from 2008 to 2013:
